Seat height adjustment

Sitness beweg!

Dondola®
Medizinisch getestet – Das Original
Medically tested - the original
Sitting in motion - Dondola® seat joint

"The healthiest WAGNER chair ever." WAGNER redefines the way of sitting! Due to the unique movement of the Dondola® seat joint WAGNER office chairs promote noticeable the health of your back*. They have received several awards, including by the leading professional journal "Facts".

*The medical survey of the University of Regensburg under direction of Prof. Grifka shows revolutionary findings:

- + 66% of the test persons report a decline of pains (visual anatomical scale)
- + 50% decline of restrictions in everyday life caused by back pains (Oswestry Disability Index)
- + Significant increase of well-being in general by up to 39% (SF36)

Survey available on: www.wagner-wellness.com

Dondola® Technology

The new generation of the patented Dondola® seating surface is available now! Completely invisible - integrated between seat and mechanism - it uncouples the fixed connection to the base part of the chair. The three-dimensional moveability of the seat prevents an unchanged seating position lasting for hours and supports permanent dynamic seating and activates the back muscles - the principle of the exercise ball is integrated into the swivel chair!
